

AJ

for Executive

Ideal Elasticity Distribution and Reclining Mechanism

The widths and height of the leaning back of AJ Chair is 472mm and 630mm respectively. People who are in big physique can also fit in with this size. The cell of 3D mesh structure pursuing an ideal elasticity distribution can control the variation ratio which similar to the combination of different size & shape and achieve the optimal holding sense.

Reclining mechanism includes auto-sensing mechanism that provides the optimal reclining strength to respond to the users' physique and posture and synchronized reclining mechanism, which can be adjusted based on the physique and preference by manual operation.

You can choose either one according to usages.

NUDE

WITH UPHOLSTERY
