CLEAN ROOM CHAIR COLLECTIONS

FOR ESD AND GENERAL
CLEAN ROOM APPLICATIONS

Extremely Durable & Reliable

1, Model Code

2, Function Code

■ Process of Production

A, ESD Test
Every Chair is checked for ESD before shipment. All chairs are required to perform our standard.

B, Cleaning
Final Cleaning is done at cleanroom in our factory.

C, Particle Push-Out
In order to reduce the possibility of contamination, particle are squeezed out before packing

D, Clean Pack Shipment
All chairs are cleanly packed after the test. This will help easy installation when customer starts to use our products.

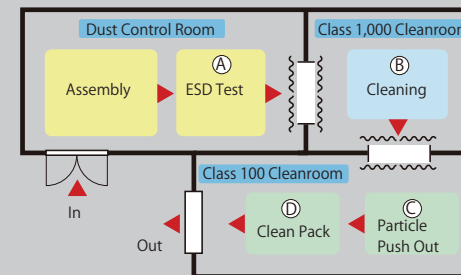

■ UCL-300 Series

■ UCL-100 Series

■ Our Production Process

■ Standard static performance test for UCL-300

Our Process
Our cleanroom chairs are produced under strict quality control. Chairs are packed in a cleanroom environment thus it has controlled level of contamination and easy to install in the cleanroom.
